

Add more horsepower to your automotive products with aluminum aerosol packaging in 66-76mm sizes from CCL Container.

Ideal for a wide range of automotive spray applications, including:

- A/C Refrigerants
- Tire Inflation
- Tire Coatings and Dressings
- Wheel Cleaners and Protectants
- Engine Degreasers
- Suspension Lubricants
- Sealants and Adhesives
- Carpet and Upholstery Cleaners
- Leather Care
- Waxes and Polishes
- Truck Bed Coatings

The unmatched advantages of aluminum aerosol containers

- Strong, durable, lightweight and corrosion-resistant
- Creates greater attention and brand awareness on store shelves
- Establishes quality impression that drives preference at point-of-sale
- Offers exceptional shaping and decorating opportunities
- “Lightweighting” with aluminum increases economic efficiency
- 100% recyclability without any degradation in material quality

Designing & Decorating

CCL Container offers a full range of shaping and decorating solutions for aluminum packaging, resulting in a whole new world of design possibilities for your automotive brand and products:

- Dramatic curves and contours over the entire container length
- Embossing and debossing of graphics, patterns and logos
- Multi-color lithography up to nine colors plus base coat
- Outstanding halftone and duotone reproduction capabilities
- Fluorescent decorating creates eye-opening effects

CCL Container is a division of CCL Industries

We're North America's leading manufacturer of recyclable aluminum aerosol cans.

CCL Container offers an unsurpassed combination of experience, expertise, resources and capabilities for the development and manufacturing of innovative, brand-building aluminum containers. Complementing this are CCL Container's equally impressive shaping and decorating abilities.

CCL Container operates three manufacturing facilities in North America, all of which are ISO 9002 registered. By combining a fully staffed Package Development Team with ever-growing manufacturing technology and expertise, CCL Container continues to produce many of the finest aluminum containers in the world.

Contact your CCL Sales Representative for complete information and to request samples for compatibility testing.
